# VR, AR, MR & XR

Part 1: Early Foundations & Naming (1838–1994)

**1838** — **Stereoscope Invented**
Sir Charles Wheatstone — binocular vision concept; ancestor of VR depth perception

**1962** — **Sensorama**
Morton Heilig — first VR-like machine with 3D display, sound, scent, and fans

**1968** — **The Sword of Damocles**
Ivan Sutherland & Bob Sproull (MIT) — first head-mounted display with head tracking

**1974** — **Videoplace**
Myron Krueger — interactive artificial reality lab; forerunner of AR interaction

**1987** — **Term: 'Virtual Reality'**
Jaron Lanier (VPL Research) — officially coined the term 'virtual reality'

**1992** — **Term: 'Augmented Reality'**
Tom Caudell & David Mizell (Boeing) — coined the term in a research paper

**1994** — **Reality–Virtuality Continuum**
Paul Milgram & Fumio Kishino — defined the spectrum from real to fully virtual

# VR, AR, MR & XR

Part 2: The Modern Era (1998–2020s)

**1998** — **AR in Sports Broadcasting**
Sportvision — first yellow yard marker overlaid on a live NFL broadcast

**2010** — **Oculus Rift Prototype**
Palmer Luckey (age 18) — reignited global interest in VR; Kickstarter raised $2.4M

**2014** — **Facebook & Google Enter XR**
Facebook acquires Oculus for ~$2B; Google launches Cardboard and Glass AR glasses

**2015** — **AR Goes Mainstream**
Snapchat launches face filter Lenses; millions experience AR daily on smartphones

**2016** — **Microsoft HoloLens**
First major Mixed Reality headset — holographic computing anchored to real space

**2016** — **Pokémon GO**
Niantic — AR game reaches 500M+ downloads; largest mass AR event in history

**2020s** — **XR Across Industries**
VR/AR/MR adopted in healthcare, education, manufacturing, law enforcement, and more

# VR, AR, MR & XR

## Part 3: Current Commercial Applications

| | VR Virtual Reality | AR Augmented Reality | MR Mixed Reality | XR Extended Reality |
|---|---|---|---|---|
| **Healthcare** | Surgical training, PTSD therapy, pain management | Vein visualization, AR-guided surgery | 3D organ holograms, surgical planning | Stroke rehab, cognitive therapy |
| **Education** | Virtual field trips, vocational skills training | Interactive textbooks, lab simulations | Holographic anatomy (Case Western) | Immersive STEM learning platforms |
| **Military** | Combat and flight simulation training | Heads-up display overlays | Battlefield holographic mapping | Lockheed Martin training systems |
| **Manufacturing** | Safety training, factory layout design | AR assembly line instructions | Boeing/Ford HoloLens assembly guidance | Full digital twin environments |
| **Retail** | Virtual showrooms and stores | Try-on apps (Warby Parker, IKEA Place) | In-store holographic product demos | End-to-end immersive shopping |
| **Entertainment** | Gaming, virtual concerts, VR film | Pokémon GO, Snapchat face filters | Location-based MR experiences | Theme parks (Disney, Universal) |
| **Architecture** | Immersive building walkthroughs | On-site design overlays | Holograms projected on physical blueprints | Full project visualization suites |
| **Remote Work** | Virtual meeting rooms (Horizon Workrooms) | AR annotation for remote assistance | Microsoft Mesh shared workspaces | Cross-platform collaborative spaces |

Applications listed reflect current commercial deployments as of 2024–2025.

# VR, AR, MR & XR

Part 4: Future Commercial Applications

### 🎬 Become a Character

VR | MR

- Step inside your favourite films, shows, and games as a playable character
- Full-body avatar mapping using motion capture and AI
- Live interactive narratives — your choices shape the story
- Virtual fan experiences: walk Hogwarts, explore Middle-earth
- Collaborative storytelling with friends across the world

### ❤️ Nonprofit & Social Impact

XR

- Immersive empathy experiences — see the world through another's eyes
- Virtual disaster simulations for humanitarian aid training
- Remote medical assistance in underserved communities via AR
- XR-powered fundraising: donors experience impact firsthand
- Accessibility tools for people with disabilities in daily life

### 🌐 Universal Communication

AR | MR

- Real-time spoken language translation overlaid via AR glasses
- AI-powered Sign Language interpretation (ASL, BSL, Auslan, and more)
- Live captions and visual cues for the Deaf and hard-of-hearing community
- Cross-cultural business meetings with zero language barriers
- Educational tools teaching any language through immersive AR

*The future of XR is limited only by imagination — and the technology is closer than you think.*

Future applications represent emerging research, prototypes, and near-term projections as of 2025.

# VR, AR, MR & XR

Part 5: Biblical Implications — Wisdom for a Technological Age

### 🗼 The Tower of Babel

*Unity without God*

**Genesis 11:4, 6**

*"Come, let us build ourselves a city and a tower... nothing they plan will be impossible for them."*

- Humanity united by technology — yet pursuing self-glory over God
- God's response: division — a warning about pride-driven innovation

### ✝️ New Heaven & New Earth

*Technology in eternity?*

**Rev. 21:1–5; Isaiah 65:17**

*"He will wipe every tear... There will be no more death or mourning or crying or pain."*

- God creates a perfected reality — the ultimate immersive experience
- XR offers a glimpse of humanity's longing for a renewed, better world
- True restoration comes from God, not technology (Rev. 21:5)

### ⏳ Stewardship of Time & Money

*Redeeming what God gives*

**Eph. 5:15–16; Luke 16:11; Matt. 6:21**

*"Be very careful how you live... making the most of every opportunity."*

- Excessive XR use risks wasting time God calls us to redeem
- "Where your treasure is, there your heart will be also" (Matt. 6:21)
- If untrustworthy with money now, who will trust you with more? (Luke 16:11)
- Ask: does this technology serve God's kingdom or distract from it?

*"For we are God's handiwork, created in Christ Jesus to do good works, which God prepared in advance for us to do."* **Ephesians 2:10**

# Thank You!

*Any questions?*
